Death by Bullying

(Intro to topic)
hook to get reader's attention

Introduction

Twelve year old Bailey O'Neill was picked on almost every day. No one did anything to stop the boys who were harassing him. Bailey won't be bullied anymore. He is dead. One day, the boys punched him in the face. He was in the hospital for weeks before his death.

Thesis

Bullying is a serious problem that many people face every day. Bullying is a form of harm, has many effects on the victim and the bully, but there are solutions.

main ideas

Paragraph 2: what is bullying?

Paragraph 3: Effects

transition
Main idea 2 to 3

While the effects of bullying can last a lifetime, there are solutions. The first solution is to get help from friends. You are less likely to be bullied if you are in a group. There is safety in numbers. The second solution is to stay cool. You are more likely to get hurt if you lose control. When we are angry or scared, we are unable to think clearly. The third solution is to ignore the bully. Simply walk away so you aren't giving the bully a target. Fighting can only make things worse.
